Smoke Detector (Photo)	161	161	0	100%

NFPA 72 Compliance Notes

This report was generated using automated analysis of fire alarm system data.
Test coverage is determined by analyzing alarm events in the event history.
Manual verification of test results and physical inspection of devices is recommended to ensure full NFPA 72 compliance.

Data quality note: Analysis accuracy depends on complete event history data.
Missing or incomplete event logs may affect test coverage calculations.
