 Device Health Distribution

Want these all to actually link to their respective spots in the data, or else where on this page. I also indeedd on cloning the existing interface from honeywell softwarfe and have it as an alternativbe interface for those who are stuck in their ways and with that the ability to edit and create the programing as can be seen on the last tab above

This i actually want to make into working links that actually make work orders, or calendar events.

Smart Insights & Actions

Recommended Actions

Schedule maintenance for 1 device

System Highlights

- 162 devices operating normally
- System health score: 100/100
- 99.0% uptime maintained

Priority Issues

- MAINTENANCE** medium
1 device(s) approaching maintenance threshold
- CONFIGURATION** low
76 device(s) showing sensitivity drift
